

HELPING GOD'S BABIES

MISSION STATEMENT

Helping God's Babies Inc. is a registered non-profit in the State of Florida. We are non-sectarian nor politically motivated. We are dedicated to helping individuals with Autism & Down syndrome through the game of golf . . . By learning to play the game and finding permanent employment within the golf industry.

As we have become more knowledgeable of these children and young adults, we realize that Down syndrome and Autism are NOT a disease but truly a "Blessing From God" and deserve our love and guidance. We have recognized that in efforts to introduce "Special Needs Individuals" to golf, the well-intentioned professionals and volunteers who have consummate knowledge of their special needs, do not have the expertise to teach these individuals how to play golf. Golf instructors possess golf knowledge but are not qualified in most instances to understand the complexity of the aptitudes, capabilities and emotions involved when working with special needs children and young adults.

Our mission is to "Teach the Teachers" which will result in a standard presentation of instruction, knowledge and structure required to teach golf to this population. We authored, copyrighted and published on Amazon "An Autism and Down Syndrome Golf Teacher's Manual". We are also producing a series of videos that will be marketed worldwide to enable parents/guardians an opportunity to teach their children golf basics at home.

Autistic and Down syndrome individuals are living longer lives. ***What Is Out There For Them?***

Helping God's Babies is unique in that our Advisory Board has an extensive background in the golf industry. By certifying a facility or a golf professional to work with these individuals, it allows parents and special needs caregivers to connect with these trained golf individuals and open golf recreation and employment doors for special needs individuals worldwide.
